ranscontinental Sets Salt Water

The Transcontinental Oil com-any has 2,500 feet of salt water i the hole at three feet in the equilar pay sand, in Gamel No. 1 t the center of the east line of the puthwest of 9-24-1w, Tonkawa dis-

This well is half a mile west of the Prairie Oil & Gas Co's dry hole is that sertion, and seems to prove once conclusively that the western dge of the Tonkawa pool has been ogned. Top of the same was buckest in the Transcontinental well it 2,708 feet, at 2,711 the sait water reake in and they are now 2,716 rest.

Standard Gets Low Rate o Gulf From Refineries at Casper

In yesterday's news on the oit sage there was a report to the effect that the Midwest Refining ompany had made a big sale of caseline to the Standard of Louisi-ina, presumably for export, and low romes the report that, effective becember 16, the rate on petroleum.

three, which includes Tulsa, shall be reduced from 32% cents to 24% cents to gulf ports when for export Phis helps some, but it is extremely loubiful if refiners in the Mid-Lontinent field will see in the new rate granted the Standard on such hort notice anything but a menace to the situation as it is here. Refineries here and in Texas are depending, of course, on the export raide through the gulf ports for a large share of their business, and in any event did not look for competition from so great a distance.

The question of rates on petroleum anoffits products is to be discipled permanently at a meeting which is acheduled for December 4 at Chicago, and all advance infor pastion obtainable seems to point to the acheduled for December 4 at Chicago, and all advance infor pastion obtainable seems to point to the acheduled for December 4 at Chicago, and all advance infor pastion obtainable seems to point to the Miles Month

Drill at Breckenridge

BRECKENRIDGE, Texas, Dec. 5.
It is reported that the Texas comnany will drill 50 wells in the North
Breckenridge district within a short
time. The wells will be drilled on
the Black farm about 1s miles north

the Black farm about 15 miles north equal numbers by the International Petroleum company and the Mexican B. Gulf Oil company and covers and area of about 800 yards wide and 1,200 yards long.

Every well so far drilled in this section has been a producer and there is no indication as to where the edge lies. With the exception a fitwo drilled by the Mexican Gulf Oil company and in which tools are lost in the hole, the average production is 60,000 barrels daily.

The Cerro Azul hacienda is controlled by the Doheny interests. Approximately 18,000 barrels of oil are being secured from four of the wells, of which 80,000 barrels of oil are being secured from four of the wells, of which 80,000 barrels is being taken by the Transcontinental ance being flowed to Tampico for refining.

In addition to these wells, this company has two other producers in the hacienda in the same pool, but

The Texas Pacific Coat and Oil Co. No. 7 Newell continues to hold up to 3,000 barrels a day. It is reported that the Prairie Pipe Like company is to build a line from facksboro, Texas, to the Mexia district. A pump station site has been purchased just east of Weatherford.

Mills County.

The Mariand and others' test of the Vanselous tract, in the south-east of the southwest of 18-25-2, exnects to get the Callshim sand this week. They are now underreaming at 2.100 feet.

The Harvey Oil Company

Recently, there was reference made in this column to the effect that the Harvey Oil company, which is the name now used by the reorsanized Harvey Crude Oil company, had been successful at Mexia and this because of its having made an honest effort to settle up its dobts, even at the sacrifice of nearly all its producing properties; and this statement has brought many inquiries to this desk which the oil editor is entirely unable to answer.

For instance, it is asked: "What is the present value of Harvey Oil company stock?" and similar questions.

company store.

All the writer pretends to know about this deal is that George Currier, formerly of Kansas City and now of Dallas, had been principally instrumental in winding up the affairs of the old company, and that it appeared that he has a lot of credit coming to him. Mr. Currier is a good fellow and has always been welcome around the lobby where oil men congregate, but further than this the writer does not know anything as to the value of the shares, or the present prospects for future prosperity.

Mr. Curry will have no difficulty
